How to Measure An Arch

Arches and Eyebrowes are made so they can be fitted into almost any window. This is possible by the exclusive molding that frames these products and also by accurate measuring. Just follow these simple instructions to insure a perfect fit.

Arch

1. Measure base width of Arch opening
2. Measure height at three points (see diagram A).
3. Supply the smallest of the three measurements for the height.

DIAGRAM A

Quarter Arch

1. Measure base width.
2. Measure height and 45 degree angle (see diagram B).
3. Supply the smallest of the three measurements for the width and height.

DIAGRAM B

Redi Shade® Original Temporary Shade is made of high quality white paper, gently allowing light to filter through it.

Available in 36" and 48" widths, each measures 72" in length. Redi-Shade is completely recyclable and cordless, making Redi Shade® safe for homes with children and pets.

Royal Windows now stocks the Redi-Shade Temporary Shade, Please review the following:

36" x 72"

Six Shades Per Box @ \$43.20 / Box
Six Boxes Per Case @ \$259.20 / Case

48" x 72"

Six Shades Per Box @ 46.80 / Box
Six Boxes Per Case @ \$280.80 / Case

Measure the width of your window and if necessary, trim your Redi Shade to that width.

How do I use Redi Shade for my arch shape windows?

- Measure the midpoint of your arch window base, trim shade to that width
- Peel tape backing and as you face your window, stick the shade onto the left side of the window base
- Open the shade fan-style, and using cellophane tape, tape it to the right side of the frame and then tape shade to top center of window frame.

How do I accurately measure my window?

- The width of your window is the most important. Using a measuring tape, simply measure the inside of your window frame. Mark this width on your Redi Shade and trim to fit. If necessary, you may choose to trim the length of your shade with scissors.

WARRANTY

No Warranty On All Corded Blinds Effective May 15, 2024

IMPORTANT NOTICE REGARDING STANDARD PULL-CORD BLINDS

The U.S. Consumer Product Safety Commission (CPSC) has determined that custom window coverings with accessible operating cords longer than 8 inches pose a reasonable risk of strangulation to children 8 years old and younger. To address this risk of strangulation, the Commission is issuing a final rule under the Consumer Product Safety Act (CPSA) to require that operating cords on custom window coverings meet the same requirements as operating cords on stock window coverings, as set forth in the applicable voluntary standard.

Due to this final rule, we must exclude the warranty period for all corded blinds purchased beginning on May 15, 2024.

"All Custom-Made Corded Window Coverings have been Discontinued as of May 31st, 2024".
